# Create text with a DIFFERENT COLOR STROKE

Create something with one color and name the layer that color. Example here: blue text on blue layer

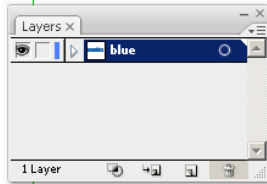

If you want to create a stroke around the text that is another color then copy and paste the text on another layer. Rename the layer the new color. Create NO FILL, and color the stroke. Make the stroke thicker. Example here: 6 pt stroke red on red layer

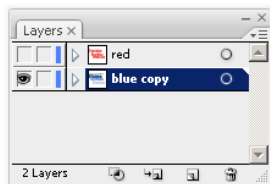

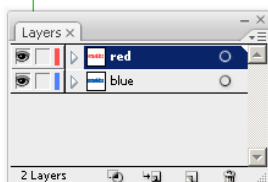

The Blue has a stroke that is 2 pts in the same color/tint
This is what creates the trapping

Last, return back to your blue layer and put a 2 point stroke on that text that is the SAME COLOR AS THE FILL. Example here: 2 pt. Stroke of blue

# GRAPHICS CLASS T-SHIRT DESIGN

- Using Illustrator create a t-shirt design for the class t-shirt.
- Make a background the actual color of the t-shirt you will choose (see book with choices).
- You are making a shirt with 2 ink colors. You can use tints of each color.
- You will have 3 layersEach color must be on its own layer
- Stay away from a black shirt and yes you can use colors other than black white and orange!

**Text Options:**
